

Soundtracker

A fun app that harkens to the days of novelty stores and those cute little knick knacks like the Mr. T talking keychain or whoopee cushion.

It's long been known that part of the magic of movies is the soundtrack (AKA the background music) that is used to emphasize the implied mood of a scene.

If its good enough for the movies shouldn't it be good enough for you?

Press the button and let your personal background music begin!

Use the Soundtracker to add spice to your life and dramatize your everyday moments!

You may test the prototype here at [Soundtracker](#)

Please allow some time for the prototype to load

After testing please feel free to take this survey <https://www.surveymonkey.com/s/JSC7QJM>

Thanks for testing Soundtracker!
